

before we build

CONTEXT MATTERS.

It is not the AI. It is what it knows about you.

why you're here

WHAT YOU'LL WALK OUT WITH.

A workspace that knows you. Your CV, your institution, your record.

Grant help in your voice. Drafted to the review criteria, not generic mush.

Reusable on every grant. Set it up once, use it for years.

SOUND FAMILIAR?

you've done this

**PASTE YOUR BIO,
GET GENERIC MUSH.**

You drop your bio into a chat box and get back something that sounds nothing like you. That is not the AI's fault. It just does not know who you are.

here's the fix

LET IT READ YOUR FILES.

PASTE AND COPY

You paste text into a chat. It only ever sees what you paste.

FILE-AWARE

It opens your folder, reads your real files, and knows you, without re-typing a thing.

three quick words

THE WORDS.

01

CONTEXT

What it sees right now: your CV and the solicitation.

02

MEMORY

Your files, so you never re-explain yourself.

03

PROMPT

How you ask: “draft my Broader Impacts.”

HANDS ON THE KEYBOARD

your turn.

LET'S OPEN IT.

Watch it read my CV and know me. Then you'll do it with yours.
